Pricing for non-standard sizes: choose mechanism width, work out area in m² of pool surface and multiply by preferred slat type. Add beam and duckboards as required.

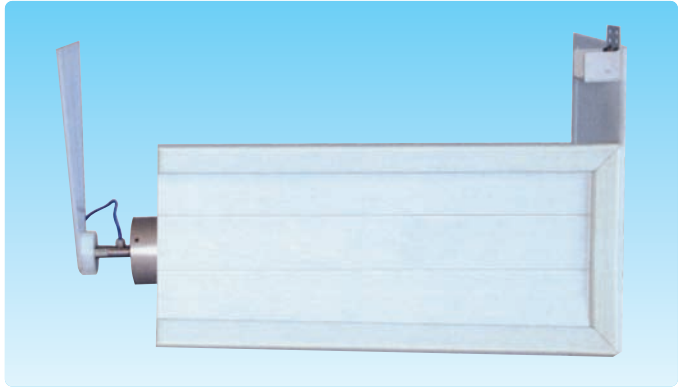

Separating Partition

- Can be installed when there is no pre-built pit
- Available between 900mm and 1860mm deep

Note: For safety reasons it is recommended the distance between bottom of beam and top of the partition should not exceed 150mm, and distance from bottom of partition to pool floor should not exceed 100mm.

Please call for prices and further details.
