

Want to save money?
Want to help the environment?

The why not consider investing in a thermally insulated pool to maximise its use. Combined with an energy saving heating device such as a heat pump or solar heating will enable you to run and enjoy your pool very economically.

XPS thermal boarding is an **Extruded** Polystyrene closed cell board (XPS). The boards 1200 x 600 x 80mm will enable you to prevent minimal heat loss through the walls and floor of the pool (U-Value of 0.025). Simple to install, the XPS system could save yo ££££'s of your energy costs.

IMPORTANT: do not be tempted to use cheaper alternative under floor installation such as EPS, Jablite, Polyurethane, Polystyrene or similar products as these absorb water and will have an adverse effect on retaining heat in your pool!

Typical saving if using a conventional gas heater on a 10 x 5 x 1.22m pool (walls only)(in dry conditions) can be in excess of a £1000 per annum! Ask your dealer for our data sheet on the various heating methods and savings that can be achieved.

XPS Insulation Boarding- 1200 x 600 x 80mm
 Supplied in packs of five

Sizing Chart		
pool size	No. of XPS Board Packs required (inc. Cuts)	To cover floor area add
20 x 12	7	7
24 x 12	8	8
28 x 12	9	9
30 x 14	10	10

WHY?

- * Easy and simple to install
- * Installation instruction available
- * Will not rot
- * Saves money
